EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the attorney for applicant, Thomas George (Reg. No. 45,740) on December 5, 2008 to incorporate the limitation of claim 2 in claim 1, and to correct claim dependencies in order to put the application in condition for allowance.

The application has been amended as follows:

1. *(Currently Amended) A buffer circuit comprising:*
 - a plurality of memory locations to hold data;*
 - a read pointer to point a read address of the plurality of memory locations from which to read output data;*
 - a write pointer to point a write address of the plurality of memory locations in which to write input data;*
 - the read pointer and the write pointer operable responsive to a read clock signal and a write clock signal, respectively, to sequence the read address and the write address, respectively, across an address space of the plurality of memory locations;*
 - a control register to store a nominal level for the buffer circuit;*
 - the control register being programmable for receiving the nominal level for setting latency of the read pointer;*

the latency of the read pointer being variable responsive to a fill level of the plurality of memory locations relative to the nominal level; and

a controller to affect operation of the read pointer dependent on the write address of the write pointer, the read address of the read pointer, and the nominal level,

wherein the controller is operable to:

determine an amount of data in the buffer circuit based on a difference between the write address and the read address,

cause the read pointer to increase the read address in advance of the read clock signal responsive to the amount of data being greater than the nominal level, and

wherein the controller is configured to adjust the read pointer independently of the read clock signal.

Canceled claim 2.

3. (Currently Amended) The buffer circuit of claim 2 1, in which the controller is further operable to hold the read address of the read pointer when the amount of data is determined to be less than the nominal level.

4. (Currently Amended) The buffer circuit of claim 2 1, in which the controller is further operable to decrement the read address in advance of the read clock signal when the amount of data is determined to be less than the nominal level.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art, individually or in combination, does not teach a buffer circuit with a controller being operable to cause the read pointer of the buffer circuit to increase the read address in advance of the read clock signal responsive to an amount of data in the buffer circuit being greater than a nominal level, and the controller being configured to adjust the read pointer independently of the read clock signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 29, 2008 has been entered.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to TANH Q. NGUYEN whose telephone number is (571)272-4154. The examiner can normally be reached on M-F (9:30AM-6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TARIQ HAFIZ can be reached on (571)272-6729. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
